**Susan Mulrone PhD, Adam Myers PhD : Netter's Physiology Flash Cards, 2e (Netter Basic Science)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Netter's Physiology Flash Cards, 2e (Netter Basic Science):

4 of 4 people found the following review helpful. Love them By VIIA Great cards for AP. Good review to help you better understand the material 0 of 0 people found the following review helpful. Great material + Advice :) By Customer These cards are really useful when studying physiology, since their true function is to prove yourself what

you already know and what you need to study more. All the images are amazing (like all of Netter's) and the explanations (on the back of each card) are very useful and clear. My advise to all those who are thinking of buying them is not to use them as a primary study material (I highly recommend Guyton or Constanzo), if not as an auxiliary to make quick reviews and self-assessments before an important class/test you've already studied for :) 2 of 2 people found the following review helpful. ... amount of detail and labeling for these cards is amazing! Highly recommend!

Find out why more students prefer Netters Physiology Flash Cards, 2nd Edition, for a quick review and self-test of human physiology essentials. These bestselling, beautifully illustrated cards are fully up to date, with images and questions on the front, answers and clinical correlations on the reverse. Over 200 hole-punched cards, organized by body system, provide concise, quick-access information on key physiology concepts for the perfect, portable review. High-quality Netter and Netter-style illustrations enhance learning. More than a dozen new cards offer expanded coverage of blood and lymph nodes while more clinical correlates throughout help you apply what you've learned. Cross-referenced to Netters Essential Physiology, 2nd Edition, but also highly effective when used with any preferred physiology text. Ideally suited for individual or group study and universally appreciated by undergraduate, nursing, allied health, and medical students!
