Deni Bown, Deni Brown : New Encyclopedia of Herbs Their Uses before purchasing it in order to gage whether or not it would be worth my time, and all praised New Encyclopedia of Herbs Their Uses:

3 of 3 people found the following review helpful. Very UsefulBy CustomerA very thorough compendium. Although missing a few herbs which I have tried to find, it has darn near everything. I use it mostly to look up new herbs I am curious about, which gives me useful introductory information to investigate further. I like the cross reference index of common names - for when I don't yet know the Latin. Nice pictures for most herbs, although not all entries have photos. Although already excellent - I would like to see this book continue to be expanded with even more herbs and photos.4 of 4 people found the following review helpful. Great bookBy John ThornberryThis is such a great reference tool. I wanted to start out in herbology with good standard books and this was just what I needed. The only thing it lacks is the dosage for medicinal, which is why I bought it but I didn't expect any book to have everything or to just have one book of this so I'm very happy with it.1 of 1 people found the following review helpful. Great BookBy A.I

absolutely love this book. Hard to find and has loads of information. Great for me since i plan on starting an herb garden.

Book by Bown, Deni, Brown, Deni

About the Author Deni Brown has been a gardener and botanist all her life, starting with a childhood fascination with her grandfather's lilies and tulips and a passion for finding and identifying wildflowers. After a varied career in horticulture, Deni Brown became a freelance botanical and horticultural writer and photographer and was a winner in the BBC Wildlife Photographer of the Year competition in 1986. Her first book, *Aroids-Plants of the Arum Family*, is a standard work on that family, and she won a Garden Writers' Association of American Award in 1990 for *Alba-The Book of White Flowers*. Deni Brown lectures widely and has made television and radio broadcasts about her work. Renowned as a lone traveler, she has trekked into remote parts of the world in search of unusual plants.
