**Joan Graci : No More Bad Advice** before purchasing it in order to gage whether or not it would be worth my time, and all praised No More Bad Advice:

No More Bad Advice is an extraordinarily timely and engaging book that highlights one of the nation s greatest challenges, preparing a workforce capable of driving growth through innovation and proactivity during a time of tremendous change, uncertainty, and evolving employment needs. Joan Graci masterfully demonstrates the need for individuals to own their professional futures by dispelling employment myths that have played a major role in

cultivating an unimpressive and unengaged workforce. It is virtually impossible for anyone who reads this book to not rethink the trajectory of their career and become the driving force behind their own success. No More Bad Advice is a must read for anyone who simply wants more out of life which in effect is all of us! Steven J. Harvey, Ph.D. Executive Director WNY Consortium of Higher Education

No More Bad Advice by Career Reformist Joan Graci speaks to a generation of people seeking employment in the ever changing job market. With a keen sense of bad advice given in the past, Ms. Graci dispels old myths and replaces them with sound proven advice. Whether looking for your career path right out of school or changing your current position, No More Bad Advice is chock full of information that will assist you in making a perfect career choice. Take my really good advice and buy this book! --Susan Dintino, Author Motivational Speaker  
About the Author  
As the owner of a successful employment agency and career coaching company, No More Bad Advice author Joan Graci is no stranger to the challenges of the new career frontier. For the last 28 years, she has made it her business to research, interview and analyze the new dynamics occurring between employers and their employees. What are the results of her latest findings? Contrary to popular belief, American employers across the board are struggling to find quality employees to fill their positions. For self-proclaimed Career Reformist Graci, this growing disconnect between employers and their potential employees is a large factor in today's unemployment and underemployment rates. Through No More Bad Advice, Graci seeks to join the mindsets of today's employers to a reformed belief system of American employees.
