**Delorme : Northern California Atlas Gazetteer** before purchasing it in order to gage whether or not it would be worth my time, and all praised Northern California Atlas Gazetteer:

1 of 1 people found the following review helpful. Great map bookBy etriley4We bought this to complete the geocaching challenge of getting a cache on every page of this book and a cache in every county. It served its purpose and we were very delighted by it.3 of 3 people found the following review helpful. Not A Pocket ReferenceBy pschlosserI bought these for use in backpacks and bugout kits. They are enormous measuring 11 x 16 inches. Perhaps not enormous, but a pretty large reference for a backpack. Perhaps NOT ideally suited for those looking for a pocket

reference. They are printed on nice thick paper and soft bound to a thick cover. These should last for some time. I agree with what others have commented that the roadways are not as prominent as a roadmap may be, but the roadways ARE pretty clear. No less prominent than the other features the map illustrates, such as terrain and landmarks. Where the AAA map mostly portrays roadways the USGS map portrays terrain. The DeLorme Atlas Gazetteer seems to treat both equally. If one is just looking for a roadmap, they may find these a bit bulky. If you ever have to take to the "back roads" or find yourself in unfamiliar territory - then this is the map for you. I will be buying more of these fine maps. 1 of 1 people found the following review helpful. A good topo map. By J. A little more abused than described, but what I needed.

The first choice of outdoors enthusiasts. Beautiful, detailed, large-format maps of every state. Perfect for home and office reference, and a must for all your vehicles. Gazetteer information may include: campgrounds, attractions, historic sites museums, recreation areas, trails, freshwater fishing site boat launches, canoe trips or scenic drives. Categories vary by state

About the Author DeLorme has been directly responsible for many of the major technological advances made in the mapping industry over the past 30 years.
