By Bruce Curtis Catherine Thuro's second book is an excellent reference source that should be useful for the serious collector and someone just starting out. There are a lot of fine photographs in color and BW. It is a good companion to her first book, which is about 360 pages, and very thorough. Of the two books I like the first book the most. The first book covers a lot of territory and has a lot of information in each section. I would recommend buying both books, you will not regret your purchase 0 of 0 people found the following review helpful. Four Stars By Jean H.
