Keith Critchlow : Order in Space: A Design Source Book before purchasing it in order to gauge whether or not it would be worth my time, and all praised Order in Space: A Design Source Book:

1 of 1 people found the following review helpful. More Geometrical Poetry By D. Frazee I am going to reiterate "This is an important book". "Order in space" is precisely that; a book on order, in space. "The fundamental element of the cosmos is space..." -p.3, Order in space, Keith Critchlow, The Viking Press Inc, 19706 of 7 people found the following review helpful. Not for beginners... By MarsGirl I bought this book to teach my Geometry students how to construct geometrical designs; however, this book is not really for beginner's. It is fantastic for getting a sense of how dimensions build on top of one another and looking at the drawings is fascinating and I'm happy to have the book in my collection. I just haven't found it that useful for learning how to create the drawings oneself. 4 of 4 people found the following review helpful. Excellent primer for budding model makers! By John F. Steel This book is an architecture school classic and is a must for anyone aspiring deeper understanding of polyhedra geometry. To date the book has no equal.

Offering imaginative insight into the area where mathematics and the arts meet, this book may be used as a practical tool by the architect, designer or scientist who has to deal with such problems as defining space, distributing patterns, packing and stacking, and communication links.

A most striking design source book . . . develops more deeply and expansively the early solid geometry explored by Buckminster Fuller, and makes virtually a new primer in mathematical and to some extent philosophical structuring (and incidentally discovers a new polyhedral shape). -- The Times [London] Keith Critchlow has one of the century's rare conceptual minds. -- Buckminster Fuller Universal in its scope. . . as inspiring as the 'pattern' books of the past. -- Interior Design About the Author Keith Critchlow is Director of Research and Director of Visual Islamic and Traditional Arts at the Prince of Wales Institute of Architecture.
