Neil G. Bauman : Ototoxic Drugs Exposed (3rd Edition): The Shocking Truth About Prescription Drugs, Medications, Chemicals and Herbals That Can (and Do) Damage Our Ears before purchasing it in order to gage whether or not it would be worth my time, and all praised Ototoxic Drugs Exposed (3rd Edition): The Shocking Truth About Prescription Drugs, Medications, Chemicals and Herbals That Can (and Do) Damage Our Ears:

2 of 2 people found the following review helpful. Well Worth the price!By E. BNeil Bauman has done an extensive

and superlative job researching the topic of Ototoxic Drugs. I was at first surprised by the price of the book, until I received it.... It's an 800 page Manual/ Bible! It's already saved me from some compromising situations. As I already have SNHL in one ear with a nerve damage/processing issue. Truly, I cannot afford to make a mistake with any highly Ototoxic Medication, ever. Thank you Mr. Bauman for this essential book! I hope more people, especially in the health care field find out about it! 1 of 1 people found the following review helpful. Book - Ototoxic Drugs Exposed By Steve I purchased this book for my wife to use in her Hearing Aid Fitting Dispensing business. Her previous copy was lost to a fire. She loves this book, and at least once a week has shared with me a story where one of her patients/clients has shown some kind of loss of hearing that seems to be drug-related ... things to be aware of for those people taking prescription medications ... talk with your doctor to get the full story and affects. The price of the book was great, the delivery of the book was fast, and the whole transaction was seamless. 1 of 1 people found the following review helpful. Five Stars By Customer Lots of "drugs to avoid" info for people with tinnitus ... well worth the \$

Have trouble hearing? Ears ringing? Room spinning? Dizzy? Find out quickly if your medications may be the culprits! The third edition of "Ototoxic Drugs Exposed" reveals the shocking truth about the specific ear-damaging effects of more than 1,000 drugs, herbals and chemicals. Just as importantly, it reveals the factors that can put your ears at higher risk, and explains how you can help reduce this risk in order to help protect your ears from the sneak attacks of ear-damaging agents.

About the Author Neil G. Bauman, Ph.D., (Dr. Neil) is the executive director of the Center for Hearing Loss Help in Pennsylvania. He is a hearing loss coping skills specialist, researcher, author and speaker on issues pertaining to hearing loss. No stranger to hearing loss himself, he has lived with a life-long severe hereditary hearing loss. Dr. Neil did not let his hearing loss stop him from achieving what he wanted to do. He earned several degrees in fields ranging from forestry to ancient astronomy (Ph.D.) and theology (Th.D.), in addition to his extensive studies in fields related to hearing loss. For the past number of years, Dr. Neil has researched a variety of hearing loss issues, including extensive studies into the effects of ototoxic drugs on our ears. His mission is helping hard of hearing people understand and successfully cope with their hearing losses and other ear conditions. To this end, he provides education, support and counsel to hard of hearing people through personal contact, as well as through his books, articles, presentations and seminars. Dr. Neil is the author of eleven books and more than six hundred articles on hearing-loss related topics. He is also a dynamic presenter, and speaks throughout the USA and Canada.
