Great resource for pediatric residents!By AustinAs a pediatrics resident taking "mommy call" at night and on the weekends, there are sometimes questions that can seem to stump even the most proficient clinician. In those cases, I found that having this as a resource was a great advantage. It walks you through the most common concerns that parents might call about and helps you triage them accordingly. It's 3 am.... do I really need to send this family to the Emergency Department, or call I schedule them in clinic in the morning? Home phone call shift are no longer a daunting task and I feel much more confident in the advice I am offering with this on hand!3 of 3 people found the following review helpful. Best book everBy Cindy H.This is the book that my office uses, so as a Triage Nurse it is fantastic. My office has several, however I prefer to have my own so I can high light in it. I love it because it helps with asking the correct questions and the rationale as well as the rule outs. I am going to have mine three hole punched so I can add things. I triage with more confidence than ever.8 of 8

By Jane Yule I ordered this because I am thinking about applying for a telecommuting job as a work at home nurse. Even though I have been a nurse practitioner for 10 years I have picked up some new information from reviewing this book. I would recommend it for nurse practitioner students.

Handling parents' telephone inquiries quickly and accurately can save time and money, as well as improve the value and efficiency of parent-physician communication. This pediatrician-authored and peer-reviewed resource has been an invaluable tool for the busy pediatrics office. Now, the completely updated and revised new edition presents easy-to-follow protocols for more than 100 common inquiries. Triage assessment questions are highlighted and practical home care advice for each condition is expanded. Other resources include: an user's guide, quality improvement checklist, telephone log sheet, over-the-counter medication questions, and more. It is an essential reference for every staff member who handles telephone inquiries.
