66 of 68 people found the following review helpful. Well thought out design, ideal tool for organizing and keeping detailed records

By TFinally! This is the perfect solution for my garden documentation. I couldn't tell from the page previews, but I took a chance after disappointment with other planners. This has everything I was looking for and more. There are sections for everything- recording weather, plot design, individual plant pages, logs for types of plants, the diary pages, propagation pages, and even formulas pages (I need to know eg how many gallons of water needed to give a 6 ft diameter raised bed one inch of captured rainwater, how many gallons cistern for 2000 sq ft of beds, etc). I worked out charts for permaculture guilds for our location which I will glue into the book. Otherwise all my other notes will be easy to consolidate here. Unlike other planners, this doesn't read like a how to book- it's just lots of really well designed pages for me to record and organize my notes. Bravo! And thanks a million.

March 20th - I used a blow dryer to soften the glue to separate the pages, trimmed the edges, then made holes with 3 hole punch and placed in a big 3 ring binder. Just need a few more pages for logs and individual plant data -- did not know I had so much data accumulated over the past 3 years and to use divider pages for the major sections. I keep all my seed packets in a 4 inch thick binder too, in 4x6 inch photo pages, so I like having another binder solution.

9 of 9 people found the following review helpful. Just what I needed

By PEBI am taking a Master Gardener class thru the county cooperative extension - - these pages are great for keeping all the information about sources for seeds, plants, dates for planting, pest, weather and many other records I will be so glad I can look back on. Love it.

3 of 3 people found the following review helpful. Best garden journal I have seen!

By mvb mommyIf I could give this book 10 stars, I would! It is chock full of pages to help you organize your garden details - from planning, to plant purchases, to growing. And there are plenty of each type of page to be useful for a long time. I received it yesterday and last night I was already sketching and planning a new flower bed for this season. I'm also a bit of a book snob and I even love the paper used and the simple graphics. I can tell this will be a useful resource for me for many years. In fact, I am a Master Gardener and I love this book so much, I plan on sharing it with my fellow Master Gardeners at our next meeting.

Designed for the gardener who wants to enjoy the benefits of gardening, without the frustrations. **FOR THE COST OF ONE SIMPLE GARDEN TOOL**, you can **OWN THE MOST VALUABLE GARDEN TOOL OF ALL** ~ one that will save you money and help you learn from experience. Even more valuable than your favorite garden trowel or spade is a written record of what works in your garden. **WHILE GARDENING BOOKS, APPS AND THE INTERNET ARE FULL OF GREAT ADVICE, THEY CAN'T REPLACE PERSONAL EXPERIENCE.** Your garden is in your microclimate, with your soil. Perennials in one part of the country aren't perennials in another. There are simply too many plants and too many variables for anyone to remember from year to year what worked where and what didn't and why.

"This is the journal for everyone who desires to grow something or share the love of cultivating. Joy has put together all the ingredients ~ to create the perfect garden because it allows the grower to be the author. Any book that has ~ is going to be used by me daily in my creative growing journey because I live by that in my 18 acres and when I help others with their growing adventure. This is the perfect book to keep out on a coffee table for everyone to enjoy and be inspired to garden." Bren Haas ~ Creative Living and Growing P. Allen Smith's 10 Great Garden Blogs (as BG Garden Blog) Podcast author interview with Mike the Gardener ~
