From GRYPHON HOUSE : The GIANT Encyclopedia of Math Activities For Children Age 3 to 6: Over 600 Activities Created by Teachers for Teachers before purchasing it in order to gage whether or not it would be worth my time, and all praised The GIANT Encyclopedia of Math Activities For Children Age 3 to 6: Over 600 Activities Created by Teachers for Teachers:

2 of 2 people found the following review helpful. Good stuff By HAB Have planned staff training around this book!
Many great ideas! 2 of 2 people found the following review helpful. Useful Book By Sarah Jean This book is packed
with useful math lessons. I use it for my 2 yr old and 4 yr old. They so far have liked many of the activities. 6 of 7

people found the following review helpful. Great BookBy Cartoon LoverI love this book. I have used this to create my entire math curriculum for my preschooler. It's a great book with a lot of activities. I really like all the movement activities.

Organized by curriculum area or time of day, each activity is complete with math concepts, materials needed, and step-by-step instructions. Math is the new focus in early childhood education, and the easy-to-use math concept index is a fabulous feature for teachers so they can easily find appropriate activities for the children they teach. Loved by children because they're fun, and teachers because they are developmentally appropriate, the activities in The GIANT Encyclopedia of Math Activities will captivate children's imaginations and create wonderful opportunities for learning and fun.Chapters Include: Anytime IdeasArtBlocksDramatic PlayFine MotorFingerplays, Songs, PoemsGamesGeneral TipsGroup or Circle TimeLanguage LiteracyMusic MovementOutdoor PlaySand Water TableScienceSensorySnack CookingTransitionsWorking with Families
