**Mortimer J. Adler : The Great Ideas Today 1978** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Great Ideas Today 1978:

From the Preface: The 1978 issue of The Great Ideas Today is devoted principally to medicine. We consider this subject in two lengthy articles, both of which are addressed to what their authors regard as serious problems that the medical profession is faced with nowadays. Additions to the Great Books Library include The Physician in Spite of Himself by Moliere, and An Introduction to the Study of Experimental Medicine by Claude Bernard.
