### **National Geographic Maps - Reference : The Heavens [Laminated] (National Geographic Reference Map)**

before purchasing it in order to gage whether or not it would be worth my time, and all praised The Heavens [Laminated] (National Geographic Reference Map):

0 of 0 people found the following review helpful. Looks great. I am glad you had the option for ...By mikey27Hanging on my wall. Looks great. I am glad you had the option for laminating. Mike0 of 0 people found the following review helpful. Very nice!By Michael EarlyThis will work great in my office!0 of 0 people found the following review helpful. Five StarsBy Andrew LontokGreat for dorm/teen bedroom wall decor.

The stars of earth's night sky seem to hang like tranquil lanterns, filling us with wonder. They inspire great works of art, and tempt our imaginations into creating stories and myths from the shapes we see. The Heavens shows star charts and constellations for both the Northern and Southern Hemispheres. All 2,844 of the stars on the chart, plus nebulae and star clusters, can be seen with the unaided eye, making this chart a perfect companion for viewing the night sky. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Sheet Size = 30.5" x 22.75"

About the AuthorFounded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
