Allen Woodall, Sean Brickell : The Illustrated Encyclopedia of Metal Lunch Boxes before purchasing it in order to gage whether or not it would be worth my time, and all praised The Illustrated Encyclopedia of Metal Lunch Boxes:

1 of 1 people found the following review helpful. The most definitive lunch box guide I have foundBy 47statesThis book has great photos and descriptions of the metal lunch boxes from the beginning until the early 90's. Most are TV shows from the 70's and 80's. There are values but they are merely a guide. It does note different variations of a box; i.e. different colors, error boxes, multiple versions, etc... Descriptions are minimal but the photos are great.6 of 6 people found the following review helpful. Great nostalgia and fond memories on every page!By Bruce E "Cousin" If you ever owned, or wanted to own a lunchbox from the 50's through the 80's, this is the book for you. This book provides fond memories of school days, mom's lunches and "what was cool!". Full color photographs of the boxes and thermoses from various angles really make it a must for someone interested in lunchbox collecting or for someone just looking for a fond recollection of a simpler day gone by...0 of 0 people found the following review helpful. Five StarsBy M. Welch Perfect book for the lunch box collector.

Treasure one of the greatest forms of pop art in America--the metal lunch box. This is undoubtedly the most comprehensive and colorful compilation of metal lunch boxes ever published. Memories of childhood buddies carried to school each day are beautifully photographed from every angle to display the front, the back and the bands of every box. With sections on care and cleaning, a list of manufacturers, and color photographs of the over 500 boxes

themselves, the authors have created a wonderful guide to an entertaining field in pop culture. The book includes foreign boxes and carry-alls as well as a section on advertising and original art.

About the Author Allen Woodall has been collecting for over 30 years and lives with his wife Bonnie in Columbus, Georgia. Sean Brickell's interest in metal lunch boxes started with his Roy Rogers Chow Wagon box. He lives with his wife Bean and two children in Virginia Beach, Virginia.
