If I check this book after I've been out it helps me identify what I've seen, like the Morels I found the other day that were actually a featured section during the week I've found them! If I look at this book before I go out, it guides me in what to look for. The featured writings are awesome as well, they've inspired some of the bulletin boards I've put up at the park and I can use a lot of the info in the programs I present. I've about filled the writing space in my personal copy so I got a new copy to keep at the park and better keep track of the phenologic rhythms in our park and the environment around us!!!! I highly recommend this book. Nature lovers will find constant affirmation and discover new loves. Non-nature lovers may even find something to like about the outdoors. It really needs to be reprinted so we don't have to rely on used copies. I'd love to base a series of classes on this book.1 of 1 people found the following review helpful. COOL!By A CustomerWondurful book! A entry for every week of the year and room for you to write your own obsevation. It has entrys about evreything from ticks to blackberry pie. If you want to know more about the N.C piedmont, this is the

book for you!
