Gsta H. Lovgren : The Ponder's Bible, All You Need To Know To Build and Maintain Your Own Pond!!!

before purchasing it in order to gage whether or not it would be worth my time, and all praised The Ponder's Bible, All You Need To Know To Build and Maintain Your Own Pond!!!:

0 of 0 people found the following review helpful. Finally, instructions on DIY Ponding!
By C. Volkers
There is so much out there about how to build and maintain a pond- Every brand of pond products has a book or two and numerous videos about how to build a pond or waterfall with their very specific products, they'll even give you the model #'s, but watch out when you check the prices! This book tells you how to actually make a pond happen, and doesn't tell you which model # of which brand to get. This is exactly what I was looking for, something that points me in the right direction, has hints to keep me from common pitfalls, and reminds me to enjoy the entire process of this hobby. It's very easy to read, interesting, and great for referencing later. Thanks Swede!

By Henry Parson
A must have for anyone that has a pond.
4 of 4 people found the following review helpful. Great resource
By P. Forrester
We had a pond built in our backyard and so I bought this book. I did not find it all that helpful after the fact. But then my husband decided to build another pond and waterfall and he devoured the book and found it very helpful. Some of the advice conflicts with other professional advice however but it is good to get other points of view.

The Ponder's Bible is the compleat guide to building and maintaining your very own pond. It has it all from digging the hole to the towering waterfall, including costs. It is "Fun and easy to read and most importantly ... Informative."
"Just incredible. I'll bet you have no idea how inspiring it is for average ponders to read this." "Wow! When I read your book, I though 'WOW! We could do that!... And we were right.'" "... a very good job! I'm sick of reading books using language only a biologist could understand." "A virtual treasure trove of information." "Your simplicity in guidelines has made my pond building a pleasure."

" ... so common sense .. so 'whatever works' ...so geared toward non-chemical and cheap!" -- A reader
"... Fun ... Great informtion. Thanks so much for giving me the opportunity to dreasm a little about getting out of the city and building a small pond . One day soon ..." -- A reader
"At last, someone who understands that just paying lots of money may not get the job done!" "The way it was written made my day. I am considering doing a pond but wasn't sure what all was involved. I couldn't believe here it is - Do this and this and this. Thank you." -- readers
