Great book that runs the reader through a process of growth and self reflection!By mot444Wonderful book of self evaluation and growth. It is as much as a workbook as a reading book which encourages the reader to self reflection and true change. Powerfully laid out that flows easily through the chapters as the reader progresses through change. While Christina Nepstad's work focuse on women, this book is good for anyone, at any stage in their career or life in general. This would make a nice gift for recent grads!3 of 3 people found the following review helpful. The Power Seat is the perfect narrative to enable you to create and develop your ...By Tom PickeringHave you ever dreaded the job interview? There is no need to be negative. After all, worry is the darkroom where negatives are developed. Lets dont go there, because Christina Nepstads, The Power Seat is the perfect narrative to enable you to create and develop your own power base to confront interviews with confidence and renewed energy.Christinas book is a very wonderful read to move you forward and toward the realization of your true inner-view by challenging you and preparing you in unique ways to capitalize on your strengths and core competencies through a variety of self-improvement scenarios.This book has special significance for me because I felt that traditional textbooks did not go quite far enough to prepare students for what is expected and what to expect in the job search, of which the interview is primary. After reading The Power Seat I have a renewed perspective on how best to empower students, making them a better learner, and me, a better mentor. If so empowered, I would make Christinas book a required reading, but for the present I strongly encourage you to read, study and apply her points of wisdom.Tom PickeringAA Professor, Business CommunicationPierce College, WA
