Jim Hancock : The Practitioner's Pocket Pal: Ultra Rapid Medical Reference before purchasing it in order to

gauge whether or not it would be worth my time, and all praised The Practitioner's Pocket Pal: Ultra Rapid Medical Reference:

4 of 4 people found the following review helpful. The book is organized very clearly and things are quick and easy to find.
By Customer
This is a really handy reference book. I have absolutely no trouble with the font, and neither will anyone with normal vision. The book is organized very clearly and things are quick and easy to find. I especially like the diff diagnosis/chief complaint section. This is a great book for a student entering clinicals or for a provider. It is spiral bound and relatively light, fits easily into a lab coat pocket. The price is right. A lot of books cost literally 6 times as much and have just as much info. I highly recommend this book!

THIS IS SO IMPORTANT FOR EVERY NP TO GET ON THE FIRST DAY OF SCHOOL!!!
Bought mine second hand from a house with toddlers, which funny enough I kinda like the crayons scribbling on some of the pages...Sort of ink-blot like. A nice way to zone out for a minute and break the cycle of hearing everyone's woes.
Genius. Small. But practical and concise information. Also only found after I completed school and graduated...but wow!
0 of 0 people found the following review helpful. Two Thumbs Up
By Ashley
LOVE this book. The 1 and 2 ratings made me laugh... this is a POCKET pal. If you are expecting as much content as your Advanced AP and Advanced Pharm books, then do not get this book. If you just want a brief quick hit of basic information, it can be useful.
Spend time reading it before relying on it live, in practice. You will have a better understanding of its usefulness, content, and ease of reference. The pages for me were by no means "blurry" or too small to read. (But I have 20/20 vision.)
Im glad I took my chances. Two thumbs up for my new pal.

A very practical collection of frequently used clinical reference material, largely in chart format: History and Physical, Differential Diagnosis, Admission and Discharge Orders, Surgical Orders, Lab Values, Organ Systems, Nutrition, Radiology, Suturing, Infectious Agents, Antibiotics and Other Drugs, Herbal Remedies, Preventive Medicine screening, Spanish phrases, ACLS and Shock, and Notes pgs., for the medical student, intern, resident, nurse, PA and EMT. Easily fits into one's pocket.
