Herbert Kohl : The Question is College (Innovators in Education) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Question is College (Innovators in Education):

14 of 14 people found the following review helpful. Very helpful and informative By A Customer I am a parent of two homeschooled teenagers and highly recommend this book not only for teens but for others who are still searching for their "niche" in life. The author gives very practical ideas on helping make decisions about their vocation and does not automatically assume that college is the way to get there.

The Question Is College is about discovering one's true vocation or lifework....and about not always assuming that college must be the next step after high school.

From Publishers Weekly Kohl (*Thirty-Six Children* ; *The Age of Complexity*) here offers research and personal experience in support of his assertion that "college may not be the only route to a full, rewarding adult life." His practical advice and evidence, garnered from his work as a counselor, will inform and reassure parents concerned about their children's rejection of college as the next step after high school. Instead of immediate higher education, Kohl recommends that high-school graduates take a year or so to explore vocational choices--as increasing numbers of young people are, in fact, doing. He stresses also that work, as much as education, should bring personal fulfillment at any age. This is a useful guide, one that should assuage anxieties of pressured high-school seniors and worried parents. Author tour. Copyright 1989 Reed Business Information, Inc.
