is like taking a business class in travel nursing. It covers everything one could think of and should increase one's position while negotiating contracts. The only reason it got 4, instead of 5 stars, is the last chapter. It sort of drags things out and adds little to the earlier chapters. This book is a must have for new and experienced travelers of all types, not just nurses. It covers the industry as a whole. Well done. 0 of 0 people found the following review helpful.
