Leslie Colvin : The Usborne living world encyclopedia before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Usborne living world encyclopedia:

10 of 10 people found the following review helpful. Great overall bookBy Debra DaudermanThis book is being used with a 9 7 year old for homeschool. The book gives very interesting information about all the different types of habitats and the animals within. It does talk about mating of animals, so if your child is not ready yet for this information, don't just hand them the book to read. I have been reading the books to my kids and explaining things they don't understand.1 of 1 people found the following review helpful. Another great Usborne bookBy Your Dream FamilyAnother great Usborne book! This is an older version, FYI. A new version should be coming out. This one is still great and my 6 year old absolutely loves it!0 of 0 people found the following review helpful. Great resource and textbookBy BltfryIt fulfills the requirements for her current homeschool curriculum's schedule. Each 2-page spread provides a lot of great information and the color photos are engaging.

First published in 1992 and now available in paperback, an illustrated reference to plants and animals which is organised according to different environments and depicts how different ecosystems interact. Part of the ENCYCLOPEDIAS series, illustrated in full colour.
