By Albert Terc
A treasure of ideas and plans to help a young adult develop into a productive adult and lead them to a more fulfilling life. Ms. Moricz takes a more holistic approach to the steps needed to ensure the young adult is well-prepared for the job market. Parents will find this as a great resource and can use the ideas in this book to provide more structure in young adults that may be unsure of how to get to the next level. Every parent wants their child to succeed. This book will help give them a head start and a map of how to get there. I definitely recommend it.

By Leah Oviedo
Get this book for your High School student, College student, or recent grad. Why do we only encourage teens to read and analyze fiction when we should be sharing books that prepare them for being competent adults? This book reads like a guide that details specific steps that teens and college students can follow on their path to success. Each section shows what and why these steps are important. Some of my favorite advice is to experience various interests in both volunteering and education so that we can align our future with our passions instead of just landing a job. Because of our culture obsession with having it all (even if we ruin our credit) her advice about creating an intelligent, lifestyle friendly budget is one of the more important points we should discuss with teens. There are great resources scattered throughout the book, like [Ventureneer.com](#) which I didn't know about until now. Thank you! Edith Moricz also shares her own experiences towards creating a career that really fit with her personal beliefs and interests. *The Young Adult's Blueprint For Success: Designing Your Life's Playlist and Landing Your First Job Before Graduation*

By Chloe
I find it really engaging in terms of its wording, especially the preface and introduction parts. I feel like being motivated by realizing how successful people are well self-disciplined and strictly stick to their habits and rituals that bring them to where they are today (thankfully I can access to their interviews through your BSO website, which is so great). And I'm appreciated to see those useful website links that provide readers with instant way to improve/ resolution to the issue you are addressing. Amongst, I particularly like the ones related to writing skills, Success magazine, and "mastering your own voice". It also opens up my mind, for there are a lot of practices that I haven't give a thought before, though they may actually be worth doing. e.g. read bio/ memoir of an exceptional leaders, start IRA, blog post for branding campaign. Overall, it is really a helpful handbook for me (if im not too old for youth) to constantly remind myself of the valuable practices leading to success.

Why Young Adults Blueprint for Success?
The young adult years a time for exploration, learning and enjoyment. Too many young adults are not using these important years wisely and investing in their future personal growth. With the help of their parents and educators, the ultimate goal of the young adult years is to prepare them for a secure, stable and promising career after completing college. Unfortunately, there are plenty of roadblocks that can delay this goal for many young adults. I wrote *The Young Adults Blueprint for Success* as a tool for young adults, their parents and their educators during these vital years. It details the A-Z on the nine key Best Practices that young adults need to focus on in order to land an exceptional job offer well before their college graduation. The promise of a challenging and exciting job, regardless of the current path taken by the young adult, is all within reach. The sooner he or she follows and implements my Blueprint for Success, the sooner a brighter, promising future becomes a reality.

About the Author
Edith T. Moricz, M.B.A., RFC is a senior revenue diversification and fundraising expert whose 20-year business career has focused on wealth management, business relationship cultivation and charitable fundraising in the Boston region. Through her nine years of fundraising, she has raised over \$6M in five years to support multiple children's causes. She is the Founder and Chief Editor for [BeyondSuccessOnline.com](#), a resource sharing the Best Practices of Successful Entrepreneurs with small business owners. She is the President of [CommUnoSuccess, Inc.](#), which leads small businesses in diversifying their revenue streams. One of her passions is to promote high personal and academic achievement among young adults. She is an alumna of Boston University (B.S.B.A. cum laude 1991, M.B.A. 2001).
