**Robert C. Kahrl, Stuart B. Soffer : Thesaurus of Patent Claim Construction** before purchasing it in order to gage whether or not it would be worth my time, and all praised Thesaurus of Patent Claim Construction:

Thesaurus of Patent Claim Construction by Robert C. Kahrl Stuart B. Soffer: Claim construction is a major phase of a patent litigation where the meaning and scope of the claims themselves - the invention - is determined by the court. The outcome of this definition phase is crucial to the respective infringement and invalidity positions of the parties. The Thesaurus of Claim Construction directs practitioners to the cases in which claim terms have previously been construed, and further to the sources of the evidence used by past courts to construe the terms in dispute. This two-volume Second Edition is updated to include over 3,500 additional entries, some of which focus on Biotechnology, Pharmacology, and Cleantech. Ordinary Skill is now included as a topic.

It provides a very useful set of alternative constructions of words and phrases with citations from US patent cases and brief commentary...This two volume set also has insightful sections on means plus function elements, design patents and how to determine what 'ordinary skill' really means in the context of the patent you're looking at. With an index that runs to over 200 pages, it's also easy to find everything. --Duncan Bucknell, Think IP Strategy  
An indispensable reference book for anyone who litigates patent cases. --Mark A. Lemley, William H. Neukom Professor, Stanford Law School
