Priscilla K. Shontz, Richard A. Murray : What Do Employers Want?: A Guide for Library Science Students before purchasing it in order to gage whether or not it would be worth my time, and all praised What Do Employers Want?: A Guide for Library Science Students:

0 of 0 people found the following review helpful. Nothing newBy bria murphyThis was a quick read, written with a lighthearted but concise voice. Id say most of it seems to be self explanatory information.0 of 0 people found the following review helpful. keeping for refernce you will love itBy PeggyIt was informing and will make a great reference book0 of 0 people found the following review helpful. Five StarsBy dazzledsassythanks

A candid, comprehensive, and insightful explanation of what library school students need to do in order to maximize their chances of getting a professional position immediately after graduation.

"The book is written in a casual, easy style with language that appeals to its audience tertiary students anticipating the next big step outside the known world of study and structure. The book has many practical real-life examples based on the authors' 30 years of experience. . . . I find this book to be very relevant to its audience. It contains much detailed information and advice about each step in the job-search process and is written in an encouraging, positive style. I certainly recommend that university libraries have it in their collections, as the principles apply across disciplines, and all graduates will find it useful in their job searching." - Australian Library Journal

"What Do Employers Want?: A Guide for Library Science Students should be considered an obligatory purchase by all first-semester library school students. Actually, it should be an obligatory purchase for all library school students and new graduates trying to find their first professional job." - American Library Association

About the Author Priscilla K. Shontz is editor of the library career site LIScareer.com, where she also provides career consulting services to new and prospective librarians. Richard A. Murray is the metadata librarian in the digital collections program at the Duke University Libraries in Durham, NC, assistant editor of LIScareer.com, and coeditor of A Day in the Life: Career Options in Library Science.
