Del Conte It is amazing how much I learned from this short little book on insurance that I never bothered to understand before. I was under the impression that all insurance was probably good enough. This book does NOT try to scare you AT ALL but it lays out the industry and products very clearly so that I can make my own decisions. It also gives you a lot of common misnomers or little known facts that you should look for when buying insurance. I'm going to do some major dissection of our policies now that I've read this! It took me one day to read this and I bet this knowledge pays dividends for years to come! 0 of 0 people found the following review helpful. Get the most out of insurance products! By Hugh N Great review of insurance products and how to get the most for your money. Very helpful understanding how insurers look at you from a risk perspective, and an honest discussion of when (and when not!) to file claims. I would recommend this to anyone who buys and uses auto, home, umbrella, or other insurance. There are super online resources and references from the authors, as well. 0 of 0 people found the following review helpful. Good For A Younger Person By 2paiges mostly pretty basic info

This book gives you the inside scoop on what really matters when buying insurance for your car, home and assets. Find out what you need to know that your agent or insurance company won't tell you. This easy to read book gives you the questions to ask when buying and renewing policies so you can get the protection you need without wasting money.
