I would definitely pick a different book.1 of 1 people found the following review helpful. exactly what i orderedBy angie jenkinsexactly what i ordered3 of 3 people found the following review helpful. A really excellent book for research procedures.By Cynthia KlinglerI give a research class. I have lots and lots of books in two languages. This book is really helpful and contains information from Cresswell, for example. I am eliminating some of my other authors and substituting this book.

"Successfully writing and defending a thesis/dissertation is often the impediment that keeps doctoral students from completing their programs. Writing the Winning Thesis or Dissertation is a great blueprint to avoid this pitfall. Every doctoral student should pick up a copy of this easy to follow guide. It is written in a very user-friendly format, answers numerous questions, and provides clear direction. Joyner, Rouse, and Glatthorn provide the graduate student a key to getting started, working through the process, and completing a winning thesis or dissertation. No graduate student should be without a copy on his or her shelf."--Dr. Henry A. Peel, Special Assistant to the President (07/27/2012)"This book is a valuable tool for students and professors alike. It addresses the concerns students have, and reminds those of us guiding dissertations of the issues surrounding this challenging process.Writing a dissertation is a step-by-step activity. This is a guide that the doctoral candidate can read, and re-read as each step is accomplished, seeing both the details and the 'big picture'."--Theresa Eagle, Dean, Graduate School of Education and Professional Development (07/27/2012)"Few tasks are as potentially intimidating to graduate students as the process of constructing and completing a masters' thesis or doctoral dissertation. In this text, the authors have provided many practical tools and ideas for guiding this process to a successful conclusion. This newly updated edition of what has been a highly popular and useful text will be well received by scores of graduate students in the various fields of education and educational leadership."--James R. Machell, Dean, College of Education and Professional Studies (07/27/2012)"The authors have provided an excellent start-to-finish how-to guide for completing a dissertation. It is practical, useful, and written in a way that is not threatening to students. This book 'brings it home' for the students. It is an important resource for any doctoral student!"--Sandy Hutchinson, EdD, Professor of Educational Leadership (07/27/2012)"Writing the Winning Thesis or Dissertation, occupies a unique place in academic literature. The book is extremely readable and offers practical and useful advice for graduate students and doctoral candidates while also observing the highest standards of scholarship and the professoriate. I recommend the book to all my doctoral students and the feedback I receive is uniformly excellent. The process for writing a thesis or dissertation is broken down into easily understood components with clear directions for following the process from the beginning (selecting a chair) to the end (the final defense). I am proud to know Dr. Rouse as a colleague, and I am proud of his work on this book."--Dr. James O. McDowelle, Professor, Educational Leadership (07/27/2012)"Writing the Winning Thesis or Dissertation represents a collection of years of professional experiences in serving on thesis and dissertation committees. Having successfully served on over sixty dissertation committees as chair, methodologist, and reader in my career, I found this book to be thoroughly covering all aspects of the dissertation process. The student oriented approach the authors take in writing and organization makes it easy for students to accept and follow instructions. What I appreciate most is the last part of the book giving students all the encouragement and support for continuing with the scholarship of their dissertation studies. This is a book I will certainly include as an essential reference for my doctoral classes."--Tak Cheung Chan, Professor of Educational Leadership (07/27/2012)"It is a difficult quest to give students the needed resources to assist in writing a thesis or dissertation. Joyner, Rouse and Glatthorn address completing this journey in an organized and sequential process. I congratulate the authors in their thoughtful portrayal."--Ellen H. Reames, Program Coordinator (10/02/2012)"Successfully writing and defending a thesis/dissertation is often the impediment that keeps doctoral students from completing their programs.
