HP Newquist : Yahoo! The Ultimate Desk Reference to the Web before purchasing it in order to gage whether or not it would be worth my time, and all praised Yahoo! The Ultimate Desk Reference to the Web:

0 of 0 people found the following review helpful. Five StarsBy Barry B.an interesting book.16 of 16 people found the following review helpful. Yahoo! I can find everythingBy Flannery HowardThis book has about a thousand websites that it reviews, and it claims that these are the best of the best. It is actually pretty funny, too, for a reference book, and got me to look at sites I never would have thought to go to.21 of 23 people found the following review helpful. What a time-saver!By A CustomerMy husband bought me this book because I was always complaining that I hated wasting hours looking for stuff on the Internet. In just poking through it the past few days I have found dozens of great sites. I can't wait to explore some more.

From Yahoo!, the #1 site on the Internet, comes the indispensable reference for getting the most of the Web without hours of searching! Yahoo! The Ultimate Desk Reference to the Web is a totally new type of book that teaches you

how to use the Web effectively and then takes you where you want to go. Whether you're looking for airline tickets, free stuff, history sites, health facts, job leads, auction sites, or consumer reports, this book provides you with the most outstanding sites in an easy-to-use format. Building on the Yahoo! principle of making the Web accessible to all users, this book selects sites for their content, longevity, usefulness and special features. Editor H.P. Newquist, a veteran Web surfer and journalist, has worked with Yahoo! to save you thousands of hours of digging through cyberspace. This is the only book you need to find what you need--and find it fast! Yahoo! The Ultimate Desk Reference to the Web features: Authoritative surfing strategies: Savvy insider tips: Suggestions for enhancing your personal webpages: Icons to help you easily identify website features. All the basics for new Internet users: Comprehensive site reviews: Over 1,000 entries covering the best the Web has to offer, including: E-commerce news research shopping, sports, entertainment health, art, finance, government, travel, family, technology science, architecture, home, work, music and just plain Yahoo! friendly fun! Yahoo! is the most popular site on the Internet and has helped over 70 million people worldwide find what they're looking for.

.com Web directories come in handy when you want to discover new Web resources without actively searching for a particular keyword on a search engine or subject tree. Yahoo! The Ultimate Desk Reference to the Web applies editorial judgment to the billions of Web sites out there, yielding a nicely annotated list that spans dozens of subject areas. Health, government, sports, news--it's all here. One really nice feature: the book lies flat at almost any page, enabling you to station the volume at your side as you use both hands on your keyboard. Having said that, you would expect a directory published under the Yahoo! brand to have a supporting Web site that would obviate the need to do manual URL entry. No such luck. At certain points, it's evident that the contents of a Web site just don't translate well onto paper: "Sound Effects has, of course, numerous belches, as well as the requisite boings, bells, and bangs." Right. But, anyway, this book is worthwhile reading for days of idle surfing. It'll make your everyday Web experience certainly more enjoyable. --David Wall Topics covered: A directory of Web sites, organized by subject area and then alphabetically. Subject areas include art, computers, entertainment, news, science, shopping, and sports. About the Author Editor HP Newquist is the author of Virtual Reality has written technology articles for publications such as The Wall Street Journal, USA Today, Forbes, Variety, Business Week, Rolling Stone, The Los Angeles Times, The Financial Times, Newsweek, and The New York Times.
