Best I have SeenBy Matthew J. BarnardI can't recommend this book highly enough: It was incredibly helpful from the beginning to end of the MBA search process. It really does help you craft a strategy, construct resumes and essays, and prepare for interviews.The best part is the small section on the individual schools: these provide a great introduction during your search and are a great starting point when beginning applications.I'm off to my first choice MBA program in a few months and I think this book is a big part of the reason why.0 of 0 people found the following review helpful. Kicks buttBy danielAmazing... its the only MBA prep book that I got, and well worth whatever I paid for it (can't remember). Anyway, I got into University of Michigan, although it wasn't just because of this book, though it did help get me ready a bunch. They definitely have the right idea. If you are unsure it provides a great roadmap. Even if you are pretty sure of your application, its still worth a good read. I used various sections of it, and it helped me set my mind straight in terms of what to think about. I then sold it on ebay... haha.

Proven strategies to get into the top business schools! Written by the co-founders of a leading business school admissions service, this book guide you through the demanding application process and help you differentiate yourself

in the ever-growing pool of applicants.
