Better than most!By Chuck PearsonI've used this map for 3 trips and it is as good as Yucatan maps get.Doesn't show all the roads and some aren't in the right place exactly.But hey this is Mexico....nothing is exactly right. Not much signage in Mexico, especially in the boonies.2 of 2 people found the following review helpful. Good EnoughBy ClaireThis is more of a geographic-topo type of map, rather a traffic and driving map. However, there are so few roads in the Yucatan that it works out really well. I found it to be perfect because you could see the geographic and natural features so nicely. It is plasticized, so it's waterproof and really easy to fold up. I'd definitely purchase it again.4 of 4 people found the following review helpful. Helpful for finding way on main and some minor roadsBy E. RockI would consider myself an international travel who frequently rents cars in destination countries. However, I would not consider myself an off-road enthusiast. Thankfully this map clearly distinguishes between major roads and others that get rough quickly.

Very detailed double sided travel map at the scale of 1:500,000 covers the whole peninsula, all of Belize, Guatemala's Peten and southeast corner of Chiapas. This makes it an invaluable tool for exploring the Maya World. The map distinguishes roads ranging from expressways (free/toll) to tertiary roads. Legend includes railways, tracks, trails, international/domestic airports, points of interest, archaeological sites, beaches, caves, gas stations, reefs, national parks, temples, camp grounds, museums, forts, shipwrecks, sinkholes, border crossings, churches/monasteries, other archaeological remains, trailer parks, airstrips, viewpoints. Includes extensive index.

About the AuthorITMB Publishing (International Travel Maps and Books) of Vancouver, Canada, prepares detailed reference and travel maps of countries, regions and cities around the world. ITMB has an excellent coverage of Mexico, from Mexico Travel Atlas to Mexico folded travel map to regional maps and city plans. It also publishes separate maps of Belize and Guatemala.
